Stephen and Mark,

Please see attached analytical results for Arkwood sampling.

Jean

Jean,

Attached are the December monthly sampling results for the Arkwood site in Omaha, Nebraska. The analytical results were consistent with previous months. The spring sample reported a PCP concentration of 45.9 ug/L and the weir sample reported <1.00 ug/L with no data qualifiers.

If you have any questions or comments, please let me know.

Best Regards,

*Jim*
